PROFILE

Computer Science graduate with hands-on web application security research experience since 2024. Focused on finding and validating vulnerabilities, explaining their impact, and providing clear reports that help engineering teams address security flaws.

SECURITY EXPERIENCE

Independent Vulnerability Researcher

Independent research via HackerOne | Apr 2024 - Present

- Identified and responsibly disclosed web application vulnerabilities to organizations including Porsche, DoorDash, Deriv, and Krisp.
- Test authentication, authorization, session management, and business logic for issues including IDOR, XSS, CSRF, and authentication bypass.
- Investigate root causes and validate findings with reproducible proof-of-concept steps, impact assessments, and remediation guidance.
- Use Burp Suite and OWASP Top 10 categories to guide testing of web applications and APIs, including injection, misconfiguration, and caching issues.

EDUCATION

Bachelor of Science in Computer Science

Beirut Arab University (BAU) | Graduated 2026

Relevant coursework: Computer Networks, Operating Systems, Databases, Software Engineering, Data Structures, Web Development, and Cybersecurity Fundamentals.

TECHNICAL SKILLS

Security testing: Web and API testing, reconnaissance, access control, authentication, session management, business logic, and vulnerability validation.

Reporting: Proof-of-concept development, root cause analysis, impact assessment, and remediation guidance.

Tools and programming: Burp Suite, Python, JavaScript, SQL, C++, Linux, and Git.

Oussama Malass

Projects, practical training & recognition

PROJECTS & RESEARCH

AI-Assisted Security Research

Independent project | 2025 - Present

- Explore AI-assisted approaches to reconnaissance and vulnerability discovery, keeping testing within agreed scope and protecting private data.

Custom Security Tooling

Personal project | Ongoing

- Develop Python tools for reconnaissance, request analysis, and web security testing, informed by open-source security projects.

PRACTICAL TRAINING & CERTIFICATION

Web Penetration Testing

PentesterLab | 2024 - Present

- Completed 150+ hands-on exercises covering web penetration testing, code review, and advanced exploitation techniques.

pentesterlab.com/profile/ouss

Web Security Academy

PortSwigger | 2024 - Present

- Completed 150+ practical labs covering SQL injection, XSS, CSRF, SSRF, XXE, access control, authentication, and business logic.

portswigger.net/web-security

Ethical Hacking Foundation

SemiColon Academy | April 2024 | 30 hours

- Completed a practical program covering network security, penetration testing, and bug hunting fundamentals.

RECOGNITION

Bug Bounty Hunter Recognition Award

SemiColon | 2025

Recognized for vulnerability discovery on global platforms, including Porsche and DoorDash.

Krisp publicly commended thorough research, clear communication, and solid findings on HackerOne (September 2026).

Earned HackerOne badges for identifying unique vulnerabilities and contributing validated reports to real-world security programs.
